La larga crisis económica que vive España ha convertido a la bolsa en un tema de gran actualidad. Pero la falta de educación financiera, que los expertos han denunciado repetidamente, ha hecho que mucha gente entrara a operar sin tener una base sólida, lo que ha tenido unas consecuencias desastrosas. La autora, profesora de trading, conoce esta experiencia de primera mano y ha desarrollado un método pedagógico de gran éxito, que aplica en los multitudinarios cursos que imparte tanto en España como en América Latina. El libro consta de cuatro partes más los decálogos: en la primera se explican los conceptos clave, en la segunda se enseña a interpretar los gráficos, la tercera se adentra propiamente en la operativa bursátil con especial atención al trading y la última se dedica al trading con indicadores.
