**Un libro para adolescentes y para los que dejaron de serlo**

Tu cerebro tiene el tamaño de un melón pequeño. Pesa alrededor de 1.400 gramos y se esconde en tu cráneo a regañadientes, plegándose en su interior como lo haría un papel arrugado. Aunque constituye sólo el 3 por ciento del peso corporal total, consume alrededor de 17 por ciento de toda tu energía. Tu cerebro es una máquina de características extraordinarias. Es capaz de transformarse en un sofisticado computador de última generación. Para eso experimenta una serie de sutiles modificaciones estructurales de las que no te enteras pero que, silenciosamente, permite que entres en la última etapa de tu desarrollo.
