

Descargar libros gratis Upheaval! - John L. Casey QBook

The United States of America will likely be devastated by earthquakes within the next twenty years. That is the startling conclusion of the authors of this book, all of them leading experts in the geophysical effects of climate change. They make a strong case for a link between the sun's cycles of behavior with highly destructive earthquakes. The authors explain that when the sun goes into a reduced energy phase, it produces colder weather and the worst earthquakes we've ever seen. Their easy-to-understand charts and graphs clearly show that we face an imminent threat. Find out the status of the threat for California, Alaska, South Carolina, Puerto Rico, Hawaii, and other states and regions as well as when and where the next catastrophic quakes will most likely strike.

The authors also share the latest damage and loss-of-life assessments from the federal government, and they argue that we're not doing enough to confront the threat. The United States could face up to \$600 billion in damages, and tens of thousands of people could die beginning in 2017, they warn. Prepare yourself, your family, and your business for the most dangerous earthquakes you'll ever face with Upheaval!
